# Executive Summary

Accurate, consistent and timely information is necessary to make informed decisions about the performance of New Jersey’s school system. The *Student Course Submission Handbook* was developed to assist school districts in providing education information to the New Jersey Department of Education (NJDOE) in a standardized format to comply with state and federal requirements. For education information to be used effectively, it needs to be identified and captured as a fundamental *data element* or a specific bit of data that can be defined and measured. This *Student Course Submission Handbook (Handbook)* provides the definition and syntax for these data elements. The standards outlined in the *Handbook* will help produce a consistent body of information upon which all stakeholders can draw.

New Jersey Standards Measurement and Resource for Teaching (NJ SMART) was developed for three primary reasons. First, New Jersey’s public education system must become more evidence-based where progress toward instructional goals are measured, and where the effectiveness and efficiency of educational programs are monitored. To achieve this goal, education data must be collected, managed and reported in a fashion that is more useful, accurate, consistent and timely. Second, major regulatory changes, such as the federal *Every Student Succeeds Act* (ESSA) and the *Individuals with Disabilities Education Act* (IDEA), are compelling Local Education Agencies (LEAs) and State Education Agencies (SEAs) to collect greater quantities of data to meet increasingly intensive reporting requirements. The NJDOE hopes to ease this burden over time by maintaining information in a more powerful and flexible way. Third, the NJDOE is committed to becoming more service-oriented to LEAs and the public. By providing better information to LEAs and other stakeholders, and by simplifying the burdensome data reports to the state, the NJDOE hopes to increase administrative efficiency through the use of technology.

# Privacy and Security

NJDOE takes privacy and security concerns extremely seriously. To ensure confidentiality of student and staff records, NJ SMART is designed with the following features: First, an audit trail of all logins, changes and logouts are recorded for all registered and authorized users. The audit trail allows for early notification of potential security breaches. It also encourages legal and appropriate use of student and staff information since all activities on NJ SMART are monitored. Persons who illegally access or download information will be prosecuted to the fullest extent of the law. Second, information in NJ SMART is segmented or compartmentalized with security rights set up by the district so that only registered and authorized users have access to information where they have a legitimate educational interest.

# Data Elements and Definitions

This *Student Course Submission Handbook* includes data elements that are currently collected and maintained by schools, districts, and the NJDOE. Not all data elements are relevant to each student. It is important to understand how each definition is implemented. In those situations where the implementation of a definition is not clear, it should be reported to NJ SMART so that a collaborative resolution can be reached.

The following information is provided for each data element in the *Student Course Submission Handbook*:

- **Name of Data Element:** The data element name used within the NJ SMART system.
- **NJDOE Number:** The numerical identification of the data element, which will remain in effect over time regardless of data elements retired or added.
- **Definition of Data Elements:** A brief description of the data element.
- **Functional, Policy or Legal Description:** The rationale for collecting the data element, and how the data element will be used. Other policy and legal implications for its collection.
- **CEDS Mapping:** An indication of how the NJ SMART data element maps to Common Education Data Standards (CEDs).
- **Is This Data Element Required?:** Indication of whether the data element is required for file submission.
- **Acceptable Values:** Indication of the data type, minimum and maximum number of characters permitted, and lists values and ranges accepted for each element.
- **Validation Checks:** Specific data validation that will occur with respect to each data element.
- **Additional Notes:** Additional relevant notes about the data element.
- **Common Errors:** Guidance on how to resolve common errors within NJ SMART.

# Local Identification Number (LID)

## NJDOE Number

1

## Definition of Data Element

A number assigned and maintained by the local school district that is unique for each student in the district and is consistently used by the district across all of its data systems.

## Functional, Policy or Legal Document

A local student identifier is assigned by the district and used to track students within a district over time and to keep student information secure and confidential. Districts must assign the Local Identification Number for each student in order to receive a State Identification Number (SID). This provides an additional matching field and an efficient way for NJDOE to provide SIDs to districts. For the Course Roster Submission, this data element is not used to verify the unique identification of the student. The LID may potentially differ from the LID that was submitted to SID Management if the district responsible for submitting a student to Course Roster Submission is not the same district responsible for reporting to SID management.

## CEDS Mapping

Local Education Agency Identifier

## Is this Data Element Required?

Field is mandatory for all students.

## Acceptable Values

**Type:** Alphanumeric

**Minimum Length:** 1

**Maximum Length:** 20

## Validation Checks

- Error will occur if field is left blank.

## Additional Notes

- Type and length can vary based on a series of numbers and letters used by a school district. A student's LID must be unique throughout the student's enrollment in the district. For school districts without a LID, a LID scheme must be created and assigned for all students so that DOE can uniquely identify all students in a particular district.
- For a LID that includes leading zeros, be sure when extracting and storing the data for transmission that the zeros are maintained. This is accomplished by creating the field as an alphanumeric data element.
- It is important for confidentiality purposes that the local identification numbers do not contain any embedded meaning linked to student-specific information.

## Common Errors

**Error Message:** Duplicate student record with the same information exists in the LEA.

**Resolution:** Review the student's course records to identify which courses are duplicated. To resolve, complete a full file upload with each course record listed once for each student.

---

# State Identification Number (SID)

## NJDOE Number

2

## Definition of Data Element

A unique number assigned and maintained by the New Jersey Department of Education that is unique for each student over time and across districts.

## Functional, Policy or Legal Document

In order to track students within and across districts over time, NJDOE will assign a unique 10-digit number to all students enrolled in New Jersey public schools. After the initial assignment of identification numbers, districts will be required to verify or obtain an identification number whenever a new student enrolls in the district.

SID will be a new number assigned by NJ SMART. The initial batch assignment of the SID occurred in March 2007. After initial assignment, districts must use the SID on all student-level data submitted to the New Jersey Department of Education and annually resolve all duplicate students within the district prior to the beginning of the school year.

## CEDS Mapping

Student Identifier

## Is this Data Element Required?

Field is mandatory for all students.

## Acceptable Values

**Type:** Numeric

**Minimum Length:** 10

**Maximum Length:** 10

## Validation Checks

- SIDs must be valid 10-digit state identification numbers as issued by NJ SMART.

## Additional Notes

- All submission files must include SIDs for students who have had SIDs issued.

## Common Errors

**Error Message:** Combination of State ID, First Name, Last Name, and Date of Birth does not match data submitted during SID Management.

**Resolution:** To resolve this error, click on the SID All Records page in SID Management. Compare the values of all four fields (SID, First Name, Last Name, and Date of Birth) in the record against the fields in Student Course Roster Submission. All four fields in Student Course Roster Submission must match exactly to the SID All Records page, **and the record in SID Management must be free of Error, Sync, Conflict - Ongoing, and Unresolved**. Make the necessary changes within your Student Information System (SIS) and then reupload to SID Management or the Student Course Roster Submission to resolve the combination error.

# Grades Earned and Completion Status Overview

The following data elements are used to collect the Grades earned by a student for the specific course section. In order to accommodate the different ways, the grades are being collected, NJSMART has allowed for 3 elements:

- NumericGradeEarned
- AlphaGradeEarned
- CompletionStatus

Grades **OR** Completion Status are required to be collected for all students in courses with Secondary course codes and an available credit of greater than 0.000. Grades **OR** Completion Status are also required for students with Prior-to-secondary course codes that have a grade span of 060X and higher (where X is replaced with full Grade Span such as 0606, 0607, 0608, and so on). One or more of the above-mentioned elements must be entered based on how the grades are currently being assigned in a school. Users are NOT required to enter all three grade data elements.

# CourseType

## NJDOE Number

196

## Definition of Data Element

An indication of the type of instructional environment in which a course section is occurring.

## Functional, Policy or Legal Document

## CEDS Mapping

No CEDS Mapping

## Is this Data Element Required?

Field is mandatory for all students.

## Acceptable Values

**Type:** Alphanumeric

**Minimum Length:** 1

**Maximum Length:** 2

- S1 = Standard course taught by a single teacher assigned to your district
- S2 = Standard course taught by co-teachers assigned to your district
- R = Remote course physically attended by the student off-site and taught by staff assigned or not assigned to your district
- C = College level dual enrollment/ dual credit course taught by staff assigned or not assigned to your district
- O= Online course taught by staff assigned or not assigned to your district

## Validation Checks

- An error will occur if a student's course type is S1 or S2 and that student does not have a staff member assigned to the course in the Course Staff section.
- An error will occur if a value of S2 is entered for a student course that **does not have more** than one staff member assigned to the course.

## Additional Notes

- The majority of the course sections reported will be reported with a CourseType of S1 or S2.
- Course Type of C should only be used if there is an existing articulation agreement between the high school and a college or university.
- Staff course data is required only for student courses that have a CourseType of S1 or S2. If a course section has a CourseType of R, C, or O and the course is taught by a staff member **not assigned** to your district **do not report a staff record to the Course Staff Section**. The student record will not be placed into Out-of-Sync when uploaded.
- Course Types R, C, and O are exceptions to the Course Roster Submission reporting responsibilities. In most cases, these courses are taught by staff not assigned to your district. These CourseType values have been developed to allow an opportunity to report these courses regardless of the lack of staff data. If the staff member taught the course and **is assigned** to your district, you should **report that staff member to the Course Staff Section**. An example would be a college level course taught within district where the environment is set as such to represent a college course. This course is considered a college level course, so it should be reported as a CourseType of C in the Student Course record. The Staff that taught the course

within district should be reported to the Staff Course Section with the same course identifying elements to link the student and staff member.

- Students within the same course section should have the same CourseType.
