Foreword

The New Jersey Department of Education is pleased to publish the *Special Education Submission Student Data Handbook*. Because quality information requires student data elements that are uniform, consistent and easy to understand, this reference guide defines and maintains a set of standards for educational data. The *Special Education Submission Student Data Handbook* is intended to support the Fall NJ SMART data submission, which reports on 1) students classified as eligible for special education and related services; as well as 2) students who have been referred for a special education evaluation during the previous school year, whether or not they were determined eligible for special education. Students served by Part C who were referred to Part B for evaluation are included in this submission set.

Several of the student data elements required for the Fall snapshot data submission are consistent with the SID Management data set requirements for NJ SMART. This supports the linking of student data across time and submissions, and also ensures accurate validation of Statewide Student Identifiers (SIDs).

Executive Summary

Accurate, consistent and timely information is necessary to make informed decisions about the performance of New Jersey's school system. The *Special Education Submission Student Data Handbook* was developed to assist school districts in providing education information to the New Jersey Department of Education (NJDOE) in a standardized format to comply with state and federal requirements. For education information to be used effectively, it needs to be identified and captured as a fundamental *data element* or a specific bit of data that can be defined and measured. This *Special Education Submission Student Data Handbook (Handbook)* provides the definition and syntax for these data elements. The standards outlined in the *Handbook* will help produce a consistent body of information upon which all stakeholders can draw.

NJ Standards Measurement and Resource for Teaching (NJ SMART) was developed for three primary reasons. First, New Jersey's public education system must become more evidence-based where progress toward instructional goals is measured, and where the effectiveness and efficiency of educational programs are monitored. To achieve this goal, education data must be collected, managed and reported in a fashion that is more useful, accurate, consistent and timely. Second, major regulatory changes, such as the federal *Every Student Succeeds* (ESSA) and the *Individuals with Disabilities Education Act* (IDEA), are compelling Local Education Agencies (LEAs) and State Education Agencies (SEAs) to collect greater quantities of data to meet increasingly intensive reporting requirements. The NJDOE hopes to ease this burden over time by maintaining information in a more powerful and flexible way. Third, the NJDOE is committed to becoming more service-oriented to LEAs and the public. By providing better information to LEAs and other stakeholders, and by simplifying the burdensome data reports to the State, the NJDOE hopes to increase administrative efficiency through the use of technology.

Privacy and Security

Privacy of student records is required by the Family Educational Rights and Privacy Act (FERPA). FERPA requires state and local education agencies to protect the privacy of education records that contain “information directly related to a student” and which are maintained by an educational agency or institution. Education data stored in NJ SMART qualify as education records within the limits of FERPA. Absent written consent from the parent or student, or a valid court order, FERPA prohibits the release of education records to anyone other than local school officials, or federal and state education agencies with legitimate educational interests for the information.

NJDOE takes privacy and security concerns extremely seriously. To ensure confidentiality of student records, NJ SMART is designed with the following features: First, an audit trail of all logins, changes and logouts are recorded for all registered and authorized users. The audit trail allows for early notification of potential security breaches. It also encourages legal and appropriate use of student information since all activities on NJ SMART are monitored. Persons who illegally access or download information will be prosecuted to the fullest extent of the law. Second, information in NJ SMART is segmented or compartmentalized with security rights set up by the district so that only registered and authorized users have access to information where they have a legitimate educational interest.

Data Elements and Definitions

This *Special Education Submission Student Data Handbook* includes data elements that are currently collected and maintained by schools, districts, and the NJDOE. Not all data elements are relevant to each student (e.g., students born outside of the US will not have a State of Birth). It is important to understand how each definition is implemented. In those situations where the implementation of a definition is not clear it should be reported to NJ SMART so that a collaborative resolution can be reached.

The following information is provided for each data element in the *Special Education Submission Student Handbook*:

- **Name of Data Element:** The data element name used within the NJ SMART system.
- **NJDOE Number:** The numerical identification of the data element, which will remain in effect over time regardless of data elements retired or added.
- **Definition of Data Elements:** A brief description of the data element.
- **Functional, Policy or Legal Description:** The rationale for collecting the data element, and how the data element will be used. Other policy and legal implications for its collection.
- **CEDS Mapping:** An indication of how the NJ SMART data element maps to Common Education Data Standards (CEDS).
- **Is This Data Element Required?:** Indication of whether the data element is required for file submission.
- **Acceptable Values:** Indication of the data type, minimum and maximum number of characters permitted, and lists values and ranges accepted for each element.
- **Validation Checks:** Specific data validation that will occur with respect to each data element.
- **Additional Notes:** Additional relevant notes about the data element.
- **Common Errors:** Guidance on how to resolve common errors within NJ SMART.

Local Identification Number (LID)

NJDOE Number

1

Definition of Data Element

A number assigned and maintained by the local school district that is unique for each student in the district and is consistently used by the district across all of its data systems.

Functional, Policy or Legal Document

A local student identifier is assigned by the district and used to track students within a district over time and to keep student information secure and confidential. Districts must assign the Local Identification Number for each student in order to receive a State Identification Number (SID). This provides an additional matching field and an efficient way for NJDOE to provide SIDs to districts. This data element is used to verify the unique identification of the student.

CEDS Mapping

Local Education Agency Identifier

Is this Data Element Required?

Field is mandatory for all students.

Acceptable Values

Type: Alphanumeric

Minimum Length: 1

Maximum Length: 20

Validation Checks

- Error will occur if multiple students within the district with the same LID are reported.
- Error will occur if field is left blank.

Additional Notes

- Type and length can vary based on a series of numbers and letters used by a school district. A student's LID must be unique throughout the student's enrollment in the district. For school districts without a LID, a LID scheme must be created and assigned for all students so that DOE can uniquely identify all students in a particular district.
- For a LID that includes leading zeros, be sure when extracting and storing the data for transmission that the zeros are maintained. This is accomplished by creating the field as an alphanumeric data element.
- It is important that for confidentiality purposes, the local identification numbers do not contain any embedded meaning linked to student-specific information.

Common Errors

Error Message: Student with the same LID exists in the LEA.

Resolution: Determine which student record should have that LID number. For the student with the incorrect LID, do a partial file upload with the correct LID number and it will overwrite the previous LID number.

State Identification Number (SID)

NJDOE Number

2

Definition of Data Element

A unique number assigned and maintained by the New Jersey Department of Education that is unique for each student over time and across districts.

Functional, Policy or Legal Document

In order to track students within and across districts over time, NJDOE will assign a unique 10-digit number to all students enrolled in New Jersey public schools. After the initial assignment of identification numbers, districts will be required to verify or obtain an identification number whenever a new student enrolls in the district.

SID will be a new number assigned by NJ SMART. The initial batch assignment of the SID occurred in March 2007. After initial assignment, districts must use the SID on all student-level data submitted to the New Jersey Department of Education and annually resolve all duplicate students within the district prior to the beginning of the school year.

CEDS Mapping

Student Identifier

Is this Data Element Required?

Field is mandatory for all students.

Acceptable Values

Type: Numeric

Minimum Length: 10

Maximum Length: 10

Validation Checks

- SIDs must be valid 10-digit state identification numbers as issued by NJ SMART.

Additional Notes

- All submission files must include SIDs for students who have had SIDs issued.
- To obtain a SID number, leave this field blank in SID Management. When submitted, a new unique SID will be generated and issued for this student.

Common Errors

Error Message: Combination of Local ID, State ID, First Name, Last Name, and Date of Birth does not match data submitted during **SID Management**.

Resolution: To resolve this error, click on the SID Snapshot records page in SID Management. Compare the values of all five fields (LID, SID, First Name, Last Name, and Date of Birth) in the record against the fields in Special Education Submission. All five fields in Special Education Submission must match exactly to the SID Snapshot Records page. **To make the necessary changes to SID Management or the Special Education Submission, please update the student's information within your district's Student Information System and reupload the record to the appropriate NJ SMART collection.** If the data is misreported in the SID Snapshot Records, the record will still appear in error for other submissions until the next snapshot even after it is updated in SID Management.

Error Message: Student is not active in district.

Resolution: Verify whether the student should be inactive in your district and if they are properly reported in SID Management with a **District Status and School Status** of I. If the student is no longer active in your district, remove the student from the Special Education Submission by **completing a full file upload without the student's record**. If this is an active student, complete a partial file upload onto SID Management with the record's **District Status and School Status** changed from I to A, the **School** Exit Withdrawal Code removed, and the **School** Exit Date erased. You will only be able to change the student's status in SID Management during the Special Education LDM period or prior to the Fall SID Management Snapshot.
